And [it was] covered with cedar above upon the beams, that [lay] on forty five pillars, fifteen [in] a row.

And all the doors and posts [were] square, with the windows: and light [was] against light in [three] ranks.

And he made a porch of pillars; the length thereof [was] fifty cubits, and the breadth thereof thirty cubits: and the porch [was] before them: and the [other] pillars and the thick beam [were] before them.

Then he made a porch for the throne where he might judge, [even] the porch of judgment: and [it was] covered with cedar from one side of the floor to the other.

And his house where he dwelt [had] another court within the porch, [which] was of the like work. Solomon made also a house for Pharaoh's daughter, whom he had taken [to wife], like unto this porch.

All these [were of] costly stones, according to the measures of hewed stones, sawed with saws, within and without, even from the foundation unto the coping, and [so] on the outside.
The great court round about [was] with three rows of hewed stones, and a row of cedar beams, both for the inner court of the house of the LORD, and for the porch of the house.

And king Solomon sent and fetched Hiram out of Tyre.

He [was] a widow's son of the tribe of Naphtali, and his father [was] a man of Tyre, a worker in brass: and he was filled with wisdom, and understanding, and cunning to work all works in brass. And he came to king Solomon, and wrought all his work.

For he cast two pillars of brass, of eighteen cubits high apiece: and a line of twelve cubits did compass either of them about.

And he made two chapters [of] molten brass, to set upon the tops of the pillars: the height of the one chapter [was] five cubits, and the height of the other chapter [was] five cubits:

And nets of checker work, and wreaths of chain work, for the other chapiter. And so did he make the chapiter: and wreaths of chain work, and one network, to cover the chapiters that were upon the top of the pillars, three rows of hewed stones, and stones of eight cubits.

And above [were] costly stones, after the measures of hewed stones, and cedars.

And the foundation [was] of costly stones, even great stones, stones of ten cubits, and stones of eight cubits.

toward the great court.
And it was an handbreadth thick, and the brim thereof was wrought like the brim of a cup, with flowers of lilies: it contained two thousand baths.

And the chapters that were upon the top of the pillars were of lily work in the porch, four cubits.

And he set up the pillars in the porch of the temple: and he set up the right pillar, and called the name thereof Jachin: and he set up the left pillar, and called the name thereof Boaz.

And he made a molten sea, ten cubits from the one brim to the other: it was five cubits high, and a line of thirty cubits compassed it round about.

And under the brim of it round about [there were] knobs compassing it, ten in a cubit, compassing the sea round about: the knobs [were] cast in two rows, when it was cast.

It stood upon twelve oxen, three looking toward the north, and three looking toward the west, and three looking toward the south, and three looking toward the east: and the sea [was] set above upon them, and all their hinder parts [were] inward.

And it [was] an handbreadth thick, and the brim thereof was wrought like the brim of a cup, with flowers of lilies: it contained two thousand baths.
And he made ten bases of brass; four cubits [was] the length of one base, and four cubits the breadth thereof, and three cubits the height of it.

And the work of the bases [was] on this [manner]: they had borders, and the borders [were] between the ledges:

And on the borders that [were] between the ledges [were] lions, oxen, and cherubims: and upon the ledges [there was] a base above: and beneath the lions and oxen [were] certain additions made of thin work.

And every base had four brassen wheels, and plates of brass: and the four corners thereof had undersetters: under the laver [were] undersetters molten, at the side of every addition.

And under the borders [were] four wheels; and the axletrees of the wheels [were] joined to the base: and the height of a wheel [was] a cubit and half a cubit.

And the work of the wheels [was] like the work of a chariot wheel: their axletrees, and their naves, and their felloes, and their spokes, [were] all molten.

And [there were] four undersetters to the four corners of one base: [and] the undersetters [were] of the very base itself.
And the ten bases, and ten lavers on the bases;
And one sea, and twelve oxen under the sea;

And the pots, and the shovels, and the basins: and all these vessels, which Hiram made to king Solomon for the house of the LORD, [were of] bright brass.

In the plain of Jordan did the king cast them, in the clay ground between Succoth and Zarthan.

And Solomon left all the vessels [unweighed], because they were exceeding many: neither was the weight of the brass found out.

And Solomon made all the vessels that [pertained] unto the house of the LORD: the altar of gold, and the table of gold, wherein the shewbread [was].

And the candlesticks of pure gold, five on the right [side], and five on the left, before the oracle, with the flowers, and the lamps, and the tongs [of] gold.

And the bowls, and the snuffers, and the basins, and the spoons, and the censers [of] pure gold; and the censers [of] pure gold, five on the right [side], and five on the left, before the inner oracle of the house of the LORD, [were of] bright brass.

So was ended all the work that king Solomon made for the house of the LORD. And Solomon brought in the things which David his father had dedicated; [even] the silver, and the gold, and the vessels, did he put among the treasures of the house of the LORD.
